

SMART INDIA HACKATHON 2026

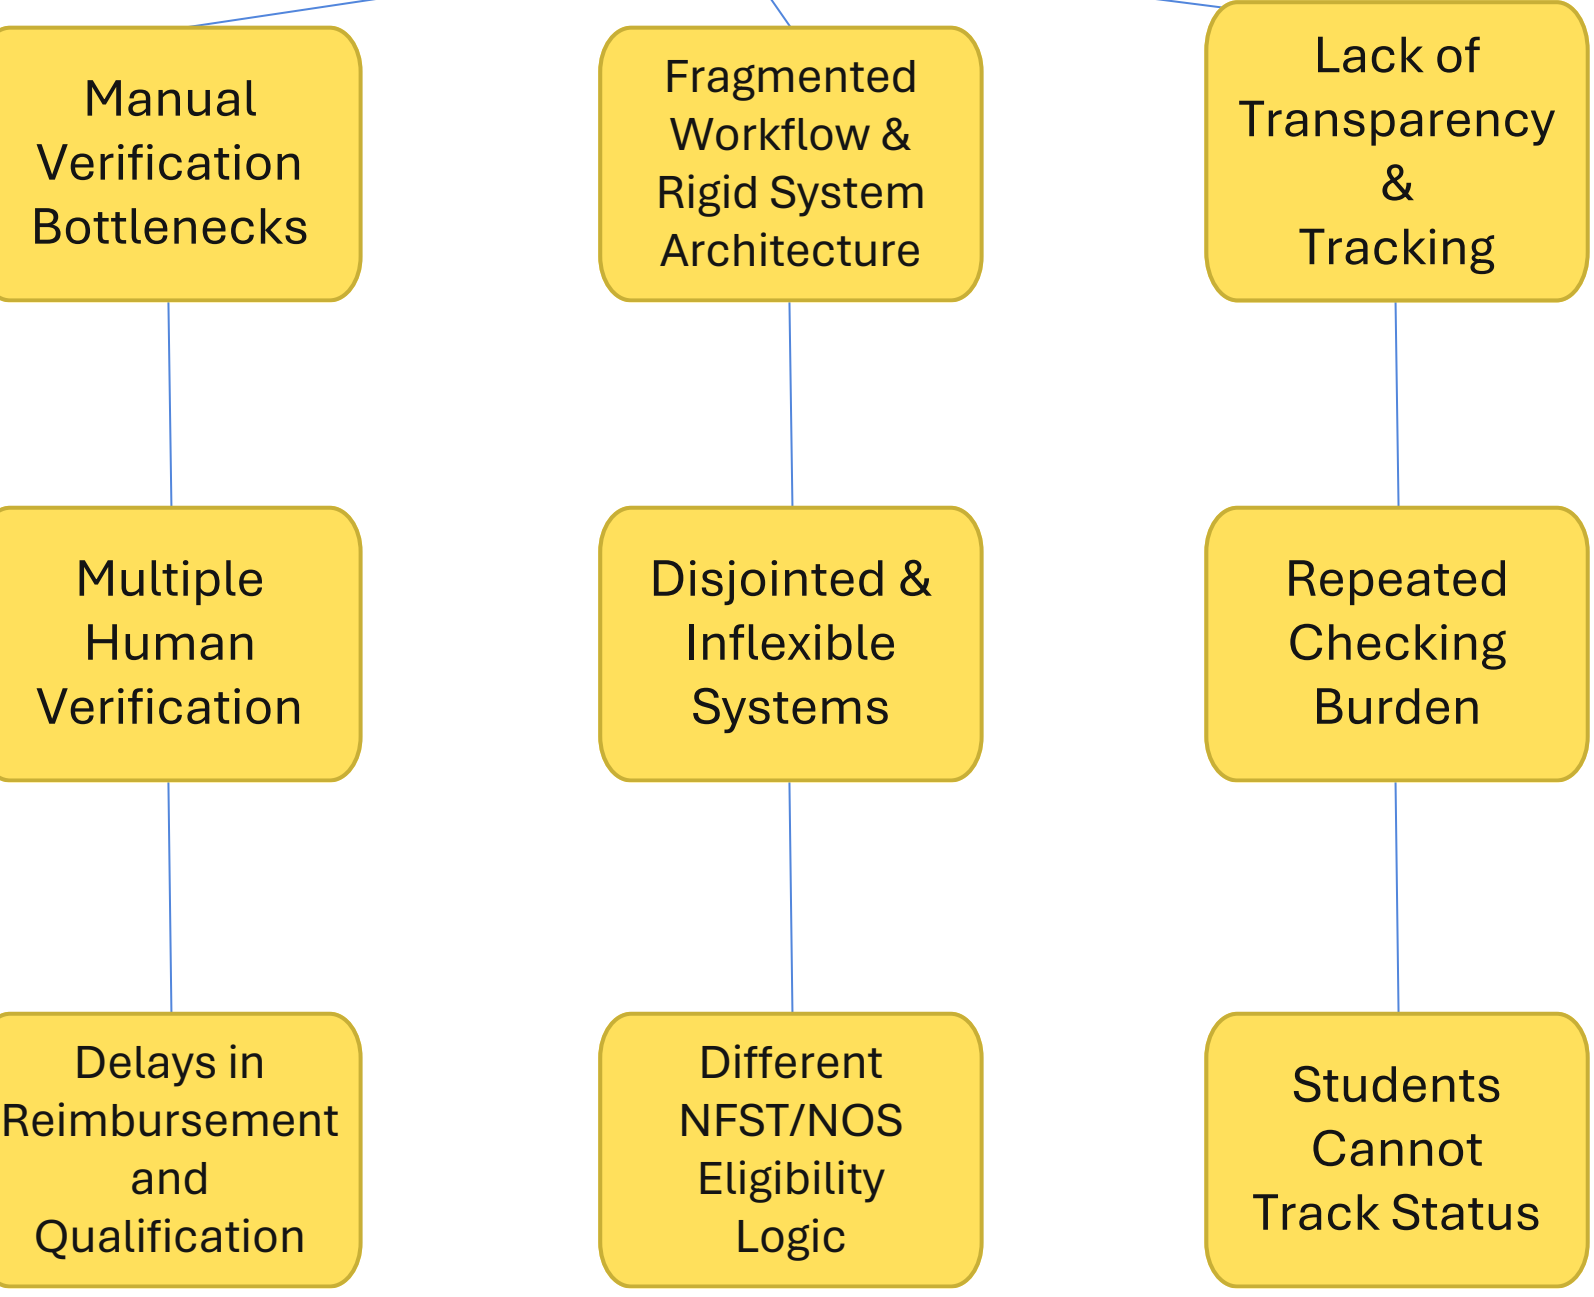

TITLE PAGE

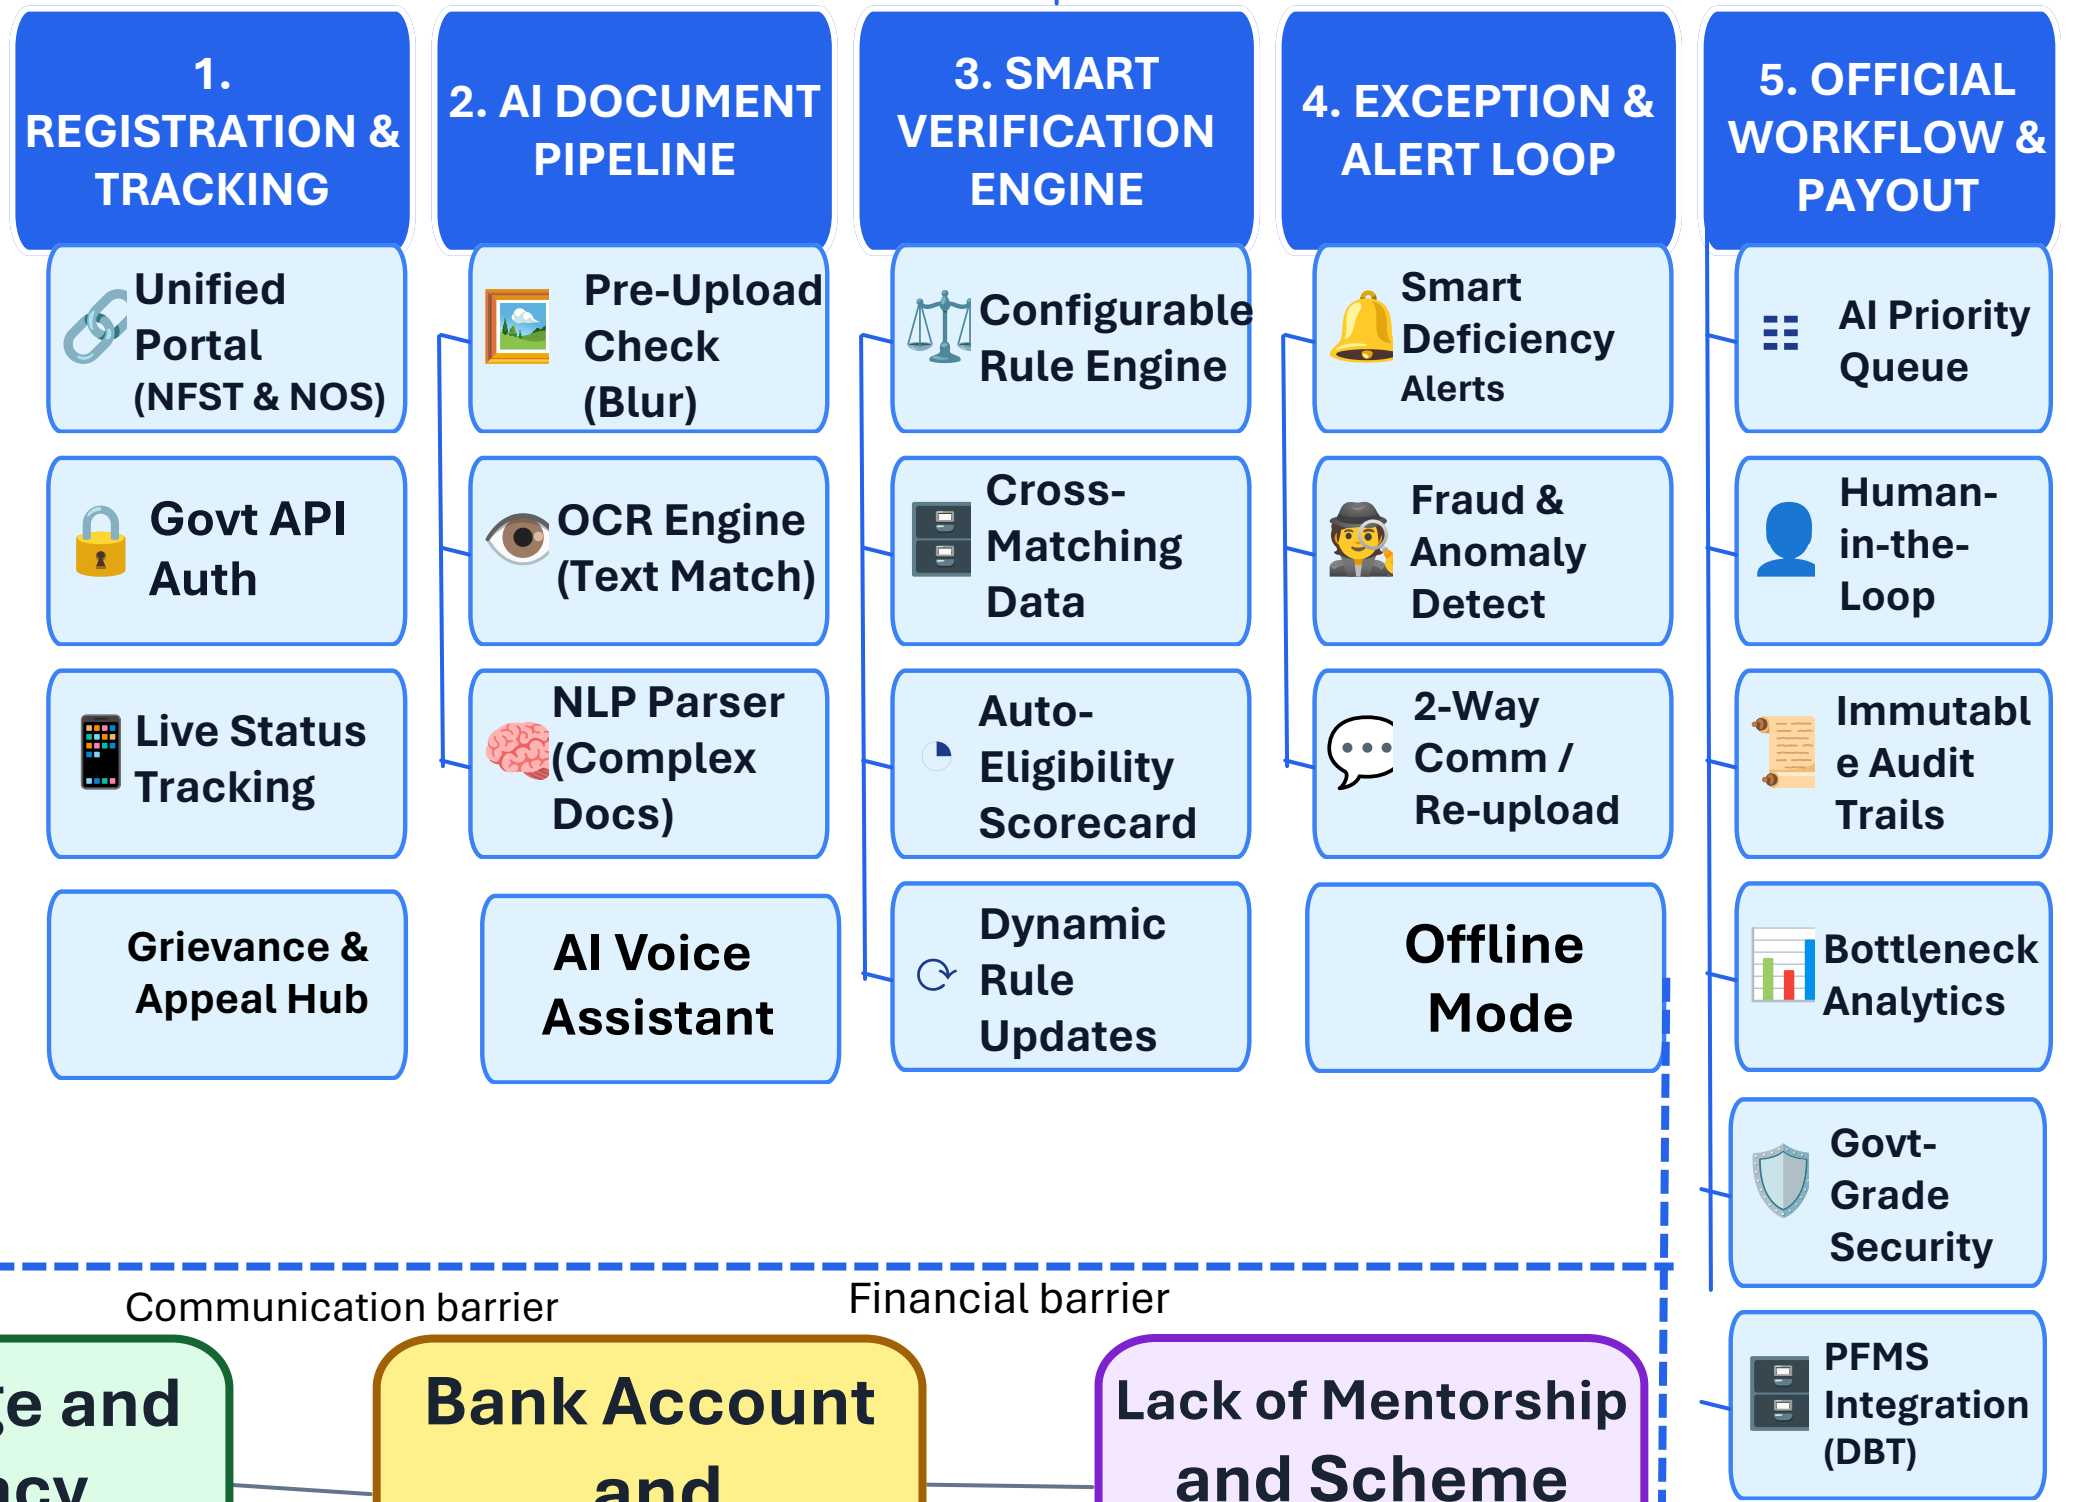

- **Problem Statement ID** - 26239
- **Problem Statement Title** - AI-Enabled
Scholarship and Fellowship Management
- System for Scheduled Tribes
- **PS Category** - Software
- **Team ID** - 174911
- **Team Name** - Maverick 2.0 2K26

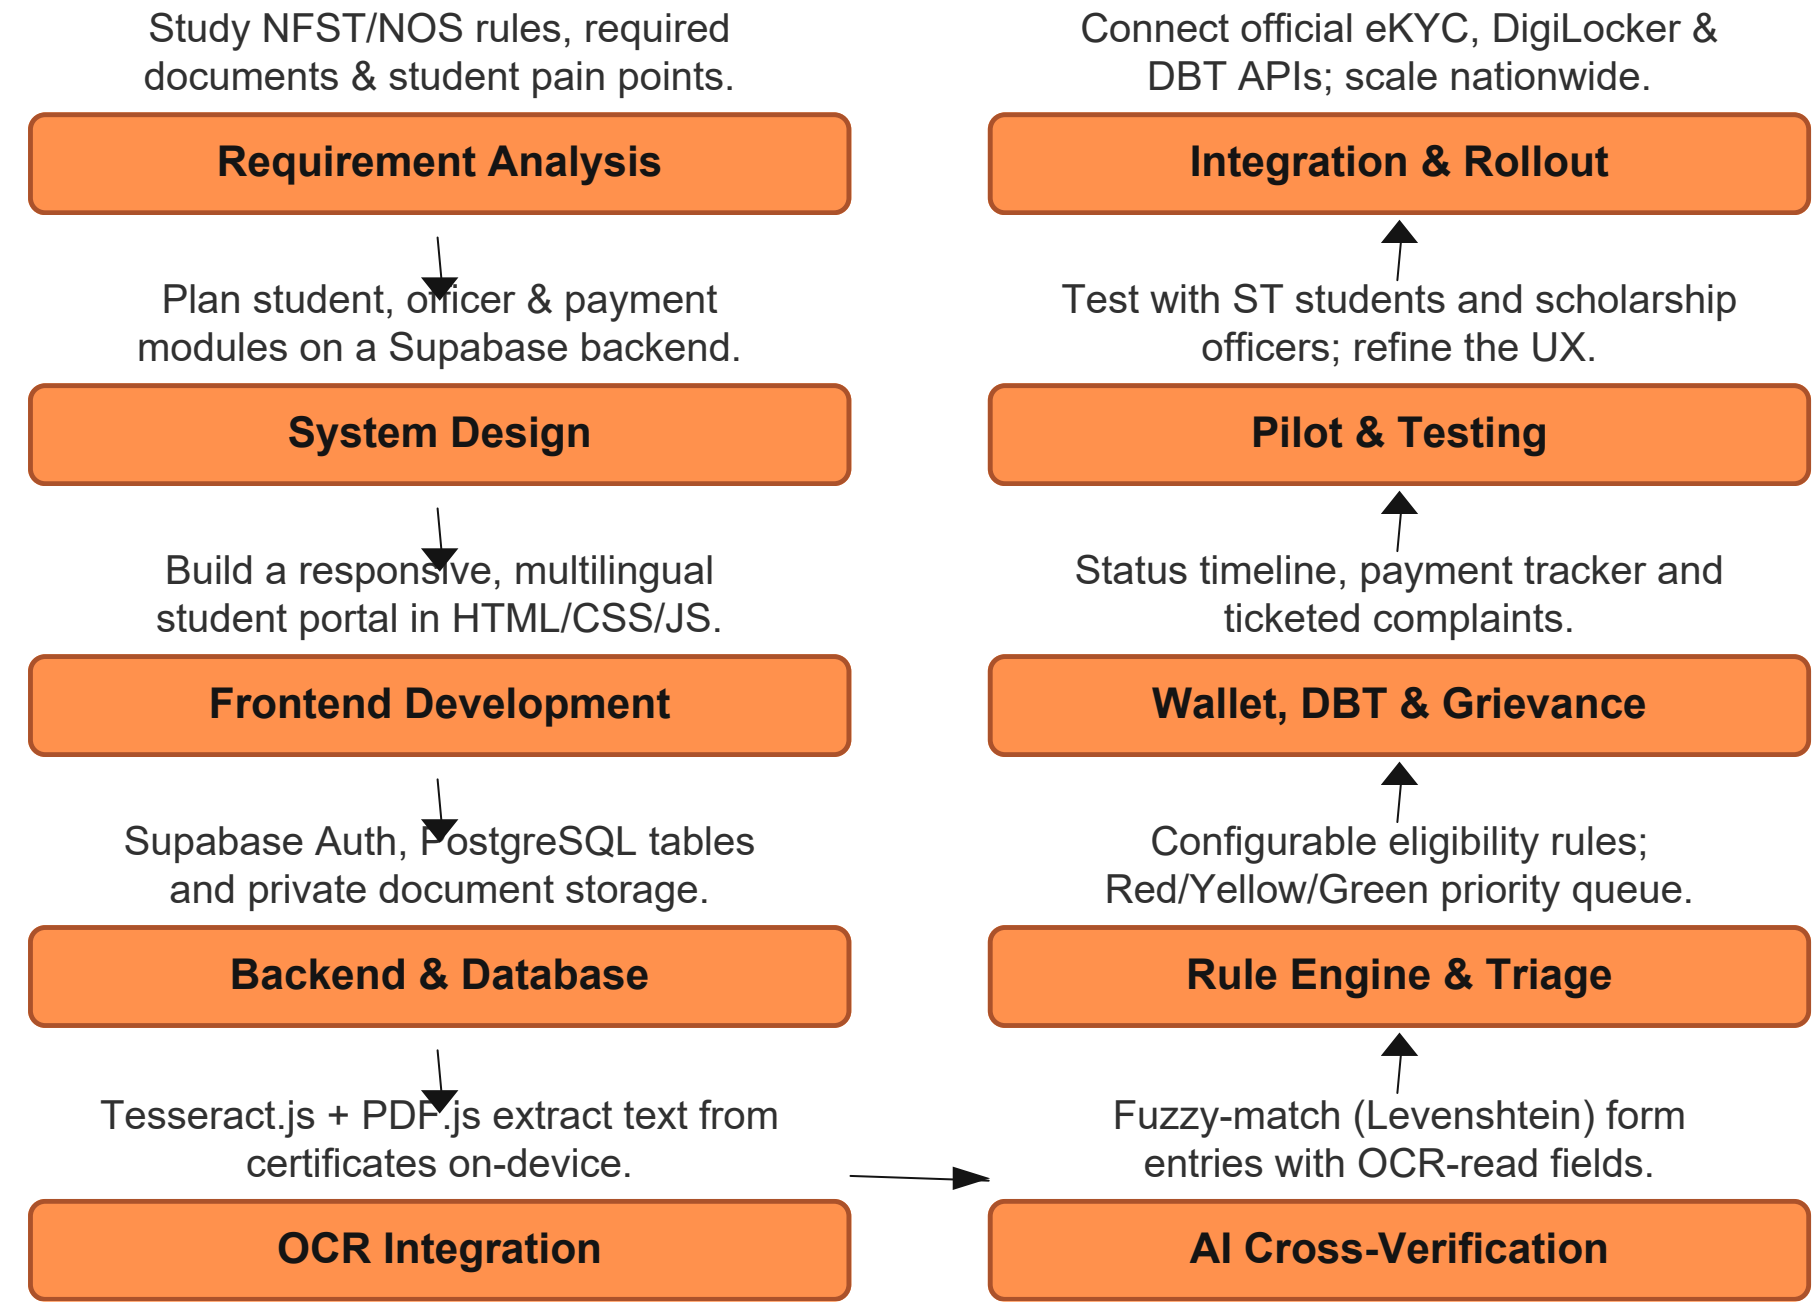

PROBLEM

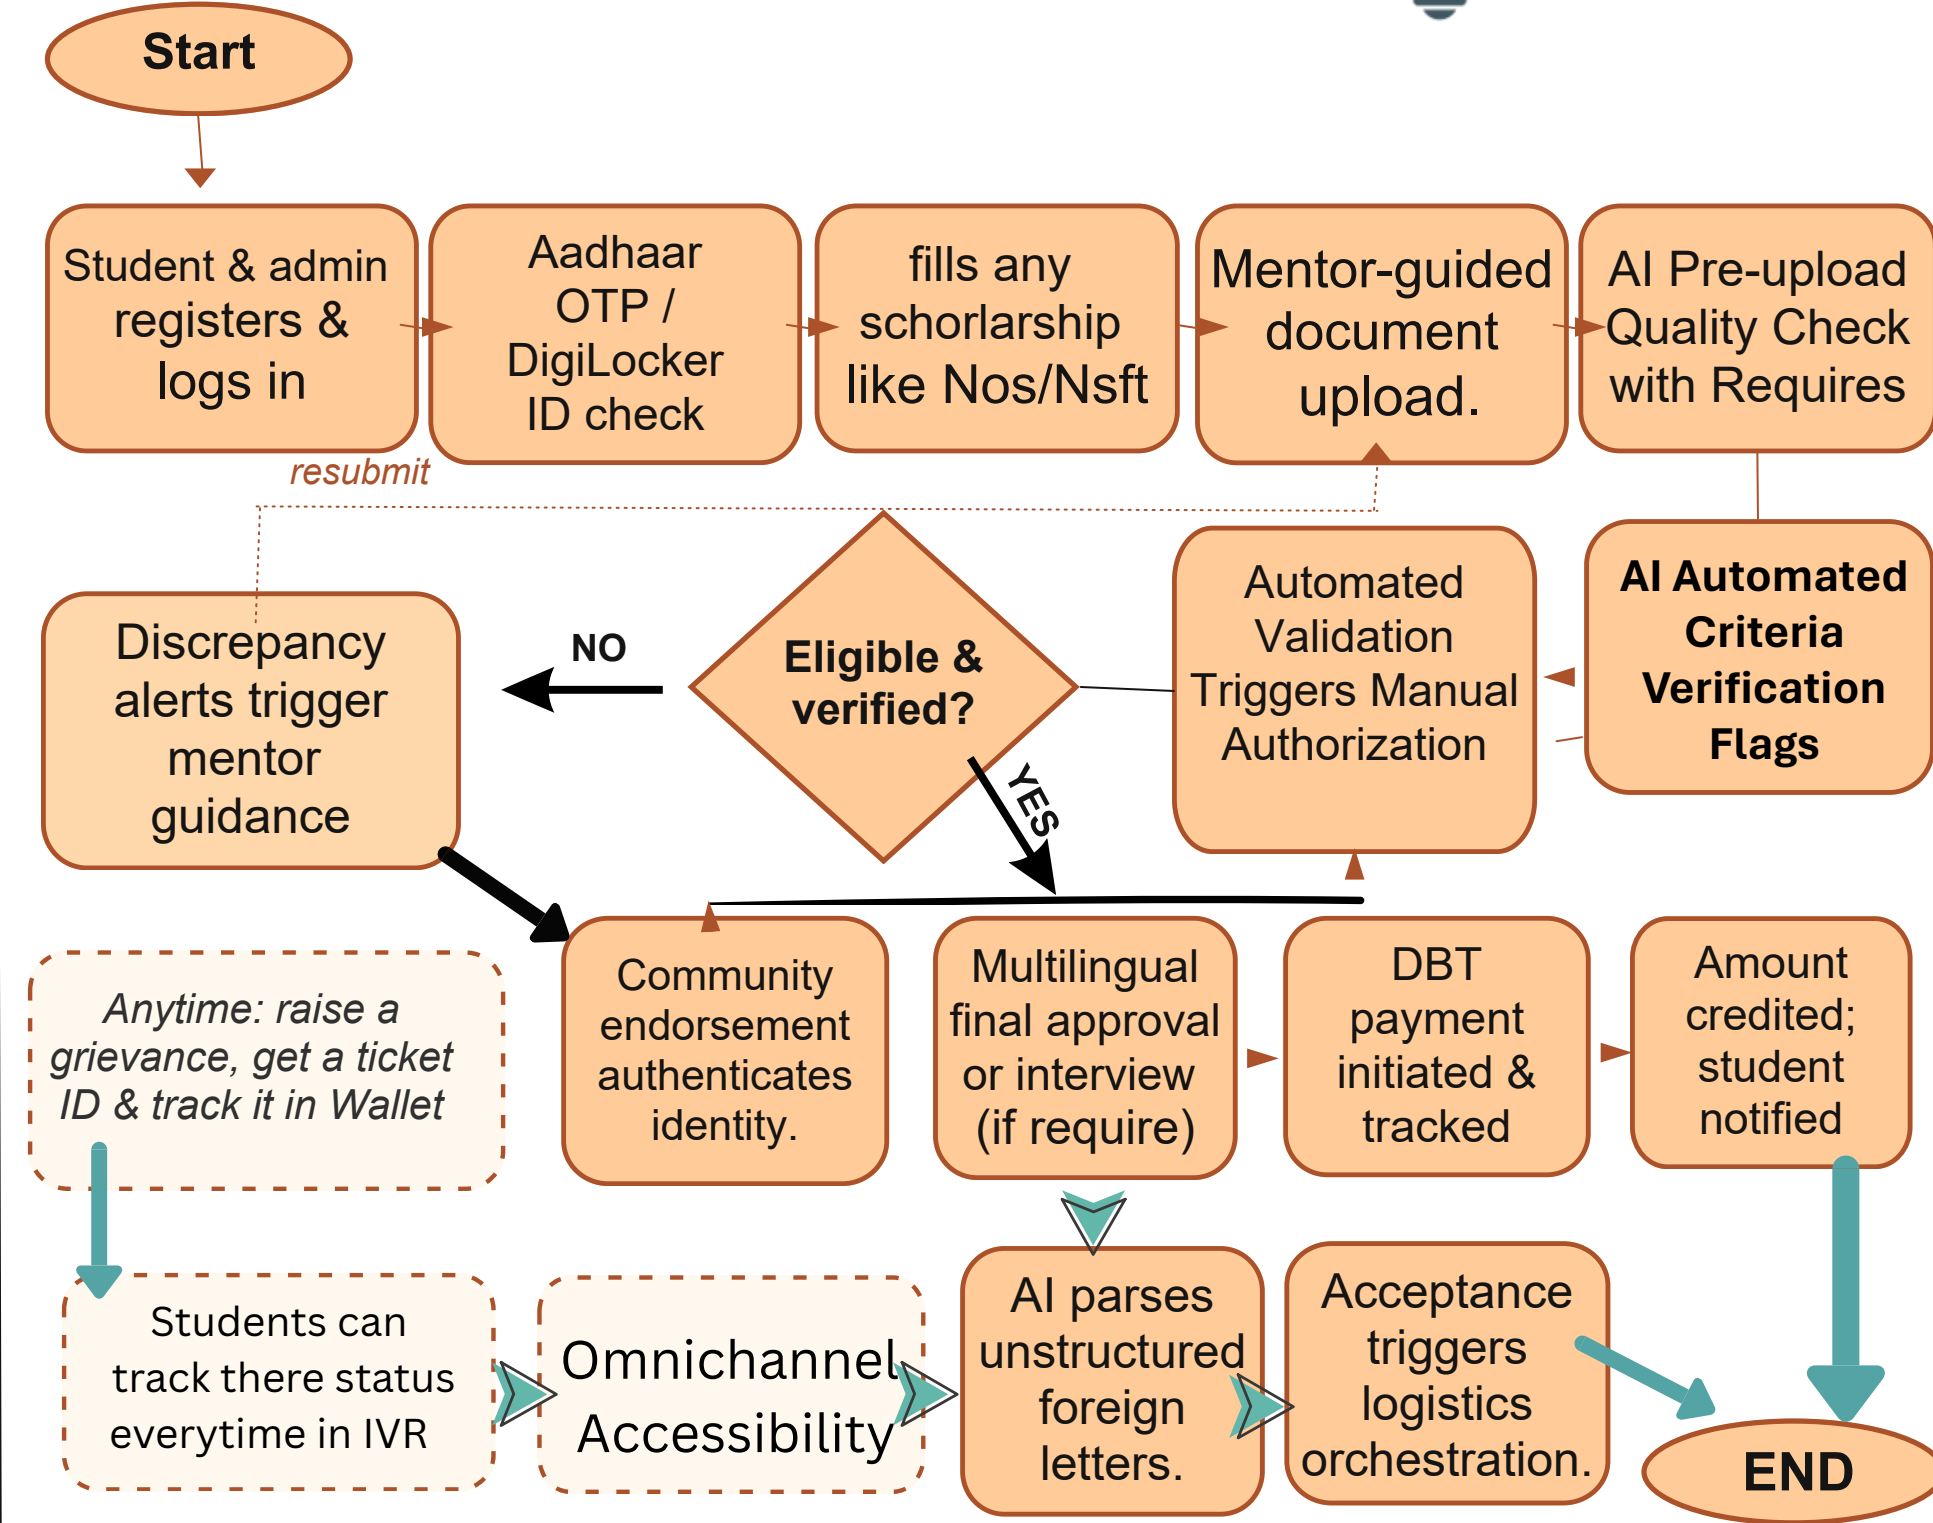

SOLUTION

METHODOLOGY

FLOW CHART:

TECH STACK

FEASIBILITY AND VIABILITY

Technical Feasibility (The Tech Stack Exists)

Proven AI tools
already exist.
EX:- Google
Cloud Documen
AND Bhashini API

Integration Feasibility

Ready government APIs
ensure integration.
EX:- DigiLocker API
and UIDAI (Aadhaar) APIs
,PFMS (Public Financial
Management System)

Operational Viability

Automation
reduces repetitive
administrative
tasks.

Technical Viability

Modular
architecture allows
individual services
to be upgraded
independently.

Implementation Feasibility (The Agile Rollout)

Phased agile rollout
is practical.
ex:- MVP for
Hackathon.

Execution & Workflow Feasibility (Human-in-the-Loop)

Human oversight minimizes
AI risk. EX:- Assistant,
not a Replacement
AND final Approve
by officer.

Financial Viability

A shared platform
can serve multiple
schemes instead of
developing separate
systems.

Long-Term Viability

The rule-driven
architecture allows
future schemes and
changing
requirements to be
configured.

UNIQUE FEATURES:

Offline-First
Functionality

(Defeating Poor Connectivity)

Voice-Assisted &
Multilingual Input

(Breaking the Literacy Barrier)

Instant AI Feedback
vs. Months of Waiting

AI Pre-Upload Check

Proactive Scheme
Discovery

AI automatically recommends

Beyond Money—
Adding Mentorship

integrated Alumni Mentorship Module

IMPACTS

True
Accessibility

Breaking
Geographical
and Linguistic
Barriers

Eradicating
Bureaucratic
Delays & Confusion

AI Document
Pipeline
and Smart
Deficiency Alerts

Transparency
and Mentorship

Empowerment
Status Tracking
Alumni Mentorship
Module

Guaranteed
Support

Proactive
Inclusion
and Financial
Certainty

BENEFITS

Administrative

- Reduced repetitive manual work
- Faster document pre-processing
- Centralized application lifecycle
- Better workload visibility

Student-Centric

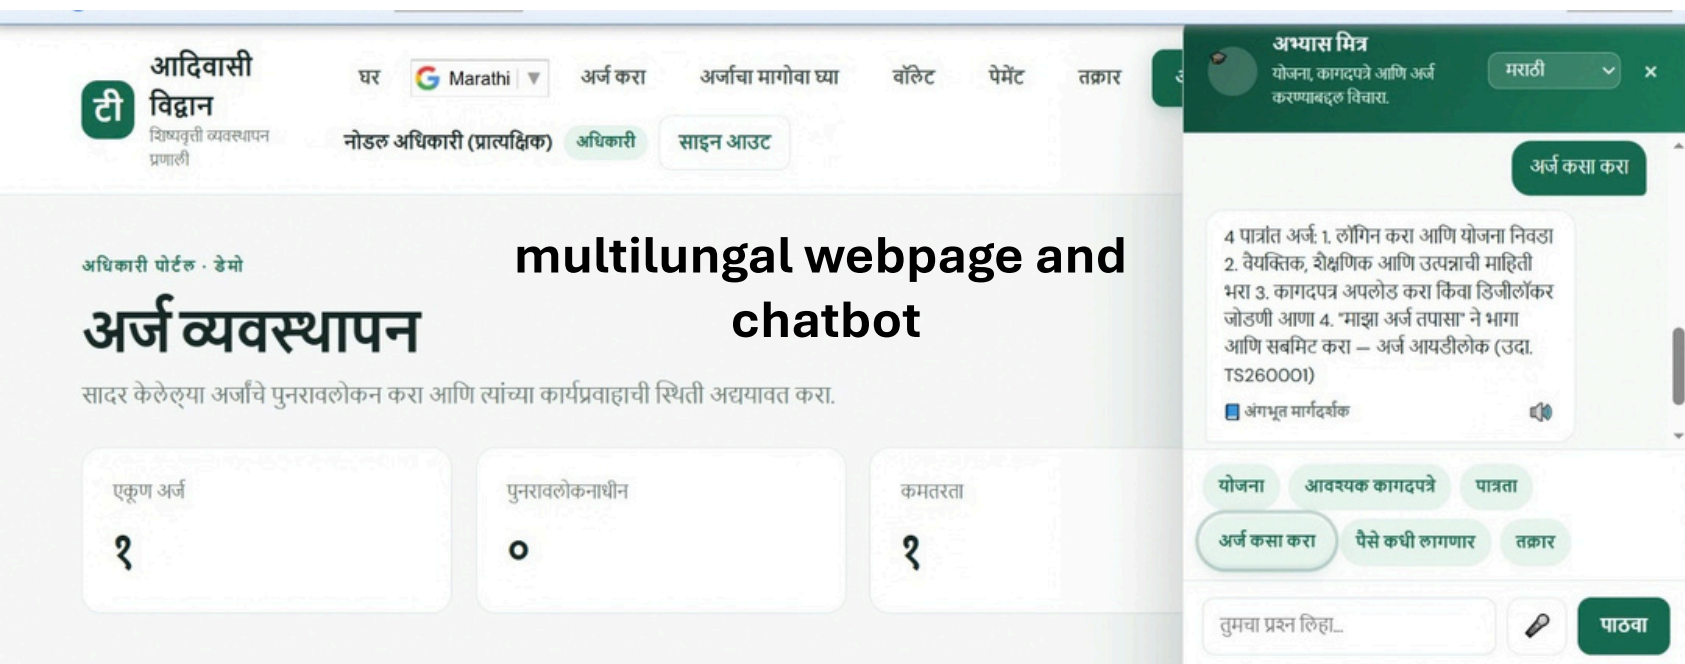

- Real-time application status
- Immediate deficiency notification
- Reduced repeated correspondence
- Clear next actions

Governance

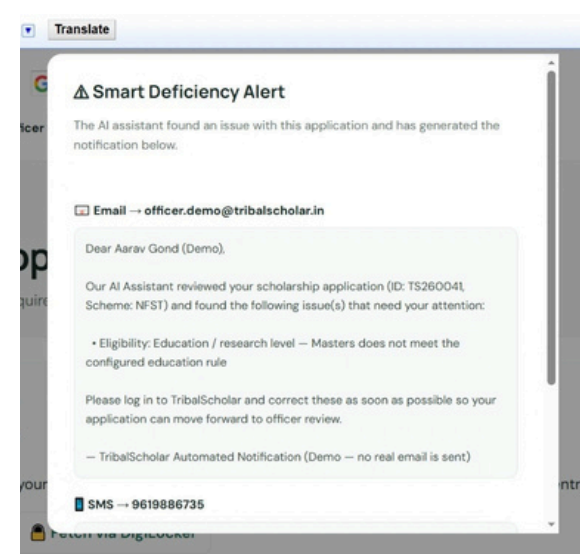

- Complete audit trail
- Standardized workflow
- Configurable scheme rules
- Better reporting

Technology

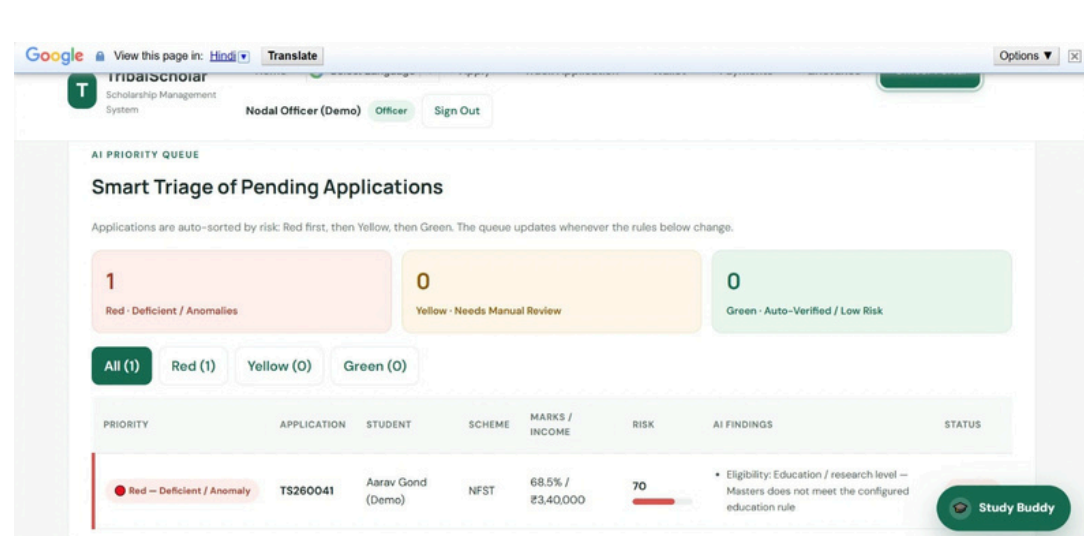

- AI-assisted document processing
- Automated validation
- Analytics
- Scalable architecture
